Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22-31, drawn to a method.

Group II, claim(s) 32-42, drawn to an apparatus.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical features which link the claims of Groups I and II is a molding device for making an optical element. The device has a sealed mold cavity with an injection duct, an entry side with a casting opening and an evacuation side. The device also has a spout with a progressively enlarging transverse section between an outlet opening of the injection duct and the casting opening of the mold cavity.

Whether or not a technical feature makes a contribution over the prior art and therefore constitutes a "special technical feature" is considered with respect to novelty and inventive step. (MPEP [R-6] 1850 II.) As evidenced by Frisch et al. (EP 0748685 A1), henceforth Frisch and Gobron et al. (US 2002/0153623 A1), henceforth Gobron, the claimed technical features are not novel: Frisch teaches a device with a sealed mold cavity (4) with an injection duct (5), an entry side with a casting opening (42) and

Art Unit: 1791

an evacuation side (44) and Gobron teaches a spout (6) with a progressively enlarging transverse section between an outlet opening (52) of the injection duct (5) and the casting opening (42) of the mold cavity (4). Combining these features from the same art does not require an inventive step. Therefore, the claimed technical features fail to define a contribution over the prior art and unity of invention is lacking between these two groups.

.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Magali P. Théodore whose telephone number is (571)
